

Mitchell Dorward

Computer Science Engineer

Computer Science Engineer from Lehigh University with a passion for creative problem-solving and a diverse foundation in software engineering, AI, and cybersecurity, seeking to drive meaningful impact through client-facing technical roles

Lehigh University

Bachelor of Science in Computer Science from the
Rossin College of Engineering | GPA: 3.71

Deans List 5/7 Semesters

Minors in Music and Spanish

TA For CSE348 GameAI

- Increased **grading efficiency** by refactoring autograders to be **scalable**.
- Made autograders more **dynamic** through creative, mathematical analysis of student solutions.
- Improved **student understanding** by holding personalized office hours

Languages

C, C++, C#, Lua, Go, Assembly, Java, JavaScript, TypeScript, HTML, CSS, Python, Rust, Flutter, SQL

Full-Stack Development

Node.js, React.js, Vue.js, jQuery, Tailwind, RESTful APIs, Database Structure, Understanding of the Internet (Application, Transport, Network, Link, and Physical layers)

Security Concepts

NIST, SHA-256, Hashing, Asymmetric Cryptographic Key Pair, Encryption / Decryption

Concepts

Multi-Threaded Programming, Compiler Design, Operating Systems, Embedded Systems, Data Structures, Containerization (Docker), CI/CD Pipeline, Linux

AI / Machine Learning

FSM, A*, Deep Learning, Generative Algorithms, Backpropagation, Neural Nets, Kernels, Cross Validation

AI Trainer @ DataAnnotation (Jan 2025 - Current)

- **Job Summary:** Push a variety of AI LLMs to **failure** and **tweak responses** and **reasoning** to show the AI how to properly solve the problem.
 - I primarily work with models on understanding very large **code contexts** and then using that context in different ways (bug fixing, feature implementation, refactoring/code organization, code explanation, etc.).
 - Other categories of work include: **agentic tool use**, creative writing, data analysis.
- **Advantages:**
 - I have a profound understanding of what AI models are **good** at and where they **struggle**.
 - I view reasoning chains very often, meaning I understand **how** the AI thinks and solves problems.
 - I have become incredibly efficient at **researching** and analyzing large swaths of code / data.
 - I am incredibly knowledgeable on *how* to use AI to improve **efficiency** and heavily do so every day.

Summer Intern @ MonroeEnergy (Summer 2024)

- Improved **public perception** through outreach
- Completed **legal permits** and **documentation** efficiently

Web App Linked

- **This Project Implements:**
 - **React.js** frontend with **stateless** JavaScript backend
 - **Data Analysis** using a custom postgresSQL database
 - Multiplayer options using **WebSockets**
 - Draft analysis and practice utilizing **AI analysis**
 - Interactive and engaging **UI/UX** on **Mobile, Desktop, and Tablet** screens
- I am the **solo dev** on this project.

[Enrolld](#)

Demo Videos Linked

- **Iterated** on direct **feedback** received from **stakeholders** during weekly **demos**
- Went live to a test group of over **100** students at Lehigh
